TOMÁŠ JAKOUBEK (Nordic skiing)

2012 – 3rd place Marcialonga Combined, 2011 – 2nd place Marcialonga Combined, 2010 – 1st place Marcialonga Combined, 2010 – 36th place Vasaloppet, 2009 – 19th place Jizerská 50

“I like doing sports, I love skiing, I enjoy racing and I hate losing! I owe my racing success as well as my pleasure in high performance skiing to Sporten!”

VLADĚNA PUSTKOVÁ (ski jumping)

2012 – 2nd place Czech Championship, 2012 – 6th place World Cup (Mixed teams) Lillehammer, 2011 – 1st and 2nd places Czech Championship

“My Sporten skis are always custom-made, precisely according to my requirements and needs. I am very happy to be part of the Sporten team – a big THANK YOU to Sporten for everything they have done for me.”

JULIA KYKKANEN (ski jumping)

2012 – 3rd place in Continental Cup Norway Lillehammer, 2012 – 8th place in Junior World Champions Turkey Erzurum, 2010 – 6th place in Continental Cup Norway Notodden

“My thanks to Sporten who is making the best skis I can have at highest quality! I’m really grateful to Sporten that I have the opportunity to jump with your skis!”

JERE KYKKANEN (ski jumping)

2012 – 1st place Eau Claire USA 5 hills tournament, 2012 – 3rd place Finnish championship Rovaniemi, 2012 – 12th place COC Iron Mountain

“Sporten skis feel awesome and every pair I get is perfect and exactly what I order and want. Sporten has really good material for skis. All pairs are really fast in the run-up – the ski base material is really the best I know and allows me a really good speed all the time.”

PETR KOTAL (Nordic combined)

2009 – 3rd place Czech Championship (Men), 2009 – 3rd place University games Harbin, 2006–1997 – 12 times 1st place – Czech Championship (Learners/Juniors)

“Thanks to Sporten I can rely on my skis even at speeds reaching to 100 km per hour, four meters above the ground.”

LADISLAV POKLUDA (alpine skiing)

2011 – 1st place Czech Masters Cup, 2010 – 3rd place WC FIS Masters CUP, 2010 – 3rd place Masters Bled First World Winter Games

“My big thanks to Sporten for their attitude to my racing. I have the best conditions and the best quality skis I have ever ridden.”

FILIP SAKALA (ski jumping)

2012 – 2nd place Czech Championship, 2012 – 6th place Fis Cup Brootleboro, USA, 2012 – 10th place, Fis Cup Wisla, 2011 – 1st place Czech Championship

“Thanks to Sporten I have managed to join the Czech national junior team and to win several races on my Sporten skis. The skis made for me by Sporten allow me to keep on improving.”

DROPIT.CZ

Tomáš Vrbický (freeride)

Martin Vrbický (filmmaker, freeride)

Honza Doubek (freeride)

Paulie Drašík (traveller, adventurer)

Dropit riders simply love any kind of snow riding – from freeride to skicross to speedski. They are people for whom snow means life and who inform you at www.dropit.cz of everything that's going on in the world of skiing, in the Czech Republic and worldwide. The team includes SX national representatives, freeriders as well as a reputed filmmaker.

“Sporten has been supplying us for long with quality freeride material without which we would be unable to enjoy our sport. It is always a surprise what premium quality the skis are. We are proud they are Czech made ☺ In short, ‘Support the locals!’”

JOSEF HEPNAR (ski-alpinism)

2012 – 1st place Mountain Rescue Services International Race, 2012 – 3rd place Central European Cup in Pilsko, Poland, 2012 – 3rd place Czech Championship in Špindlerův Mlýn

“I hope there will always be support on the part of Sporten as well as pleasure and excitement on our part and that we are able to represent Sporten in the long run. Why? Sporten has been our best choice ever!”

JAN HEPNAR (ski-alpinism)

2012 – 5th place Central European Cup Janské Lázně, 2012 – 3rd place Central European Cup Rokytnice nad Jizerou, 2012 – 4th place 3-day race in West Tatra Mountains (Bokami Západních Tater)

“Sporten skis have been driving me uphill and downhill faster and faster for three years and I sincerely hope they will keep doing so in the future. Thanks to them I am able to climb still higher peaks.”

TITANAL

Titanal plate® is a high strength, age hardenable aluminum-wrought-alloy that significantly increases the torsional rigidity and edge grip of a ski providing smooth running. It is used in combination with or instead of a certain type of fiberglass.

PREPREG

A specially produced type of high-resistance fiberglass ensuring maximum power transfer to the edge.

WOODCORE

A typical laminated high-quality woodcore. Lightweight woodcores of cross-country skis with air channels to save weight.

ULTRALIGHT WOODCORE

Low weight wooden material suitable for the given ski category, respecting required qualities of the wooden core (i.e. in particular flexibility).

POLYFLY

Special PU composite makes a perfect stable core providing excellent dampening characteristics.

3D SHAPE

Contributes to the overall torsional rigidity of alpine skis and to better aerodynamics of both alpine and cross-country skis.

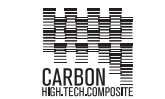

STRUCTURED TOP SHEET

The highly esthetic top sheet increasing the scratch-resistance of skis.

HONEYCOMB

A material minimizing the weight of cross-country racing skis.

CARBON HIGH TECH COMPOSITE

Carbon is used in construction in order to achieve lower weight altogether with increasing of reaction capabilities of both skis and snowboards.

DOUBLE RADIUS

By applying a new technology of two different radiuses, we have succeeded in developing truly universal skis. Smaller radius in the front allows for easy switching between long and short turns. Bigger radius provides for faster completion of the turns and ensures perfect stability in longer turns.

STEEL EDGES

Steel edges on Nordic skis are a great help in controlling the skis on frozen surface, mainly in downhill rides. They are suitable mainly for skiing on ungroomed tracks. Plus, steel edges extend the skis' life significantly.

ROCKER

Rocker (front part of the ski lifted slightly upwards) is a construction element used for two reasons: 1) Better stability in deep snow. Appreciated especially by free riders. 2) Significant help on the start of a turn. Generally easier and more comfortable control of skis on the piste.

UHM NANO GRAPHITE RACE BASE

Graphite base with ultrahigh molecular weight, manufactured by using nanoparticles. Exceptional sliding parameters suitable for most conditions thanks to several special additives. All combined, these qualities ensure maximum wax absorption. This base is used exclusively for racing skis. For keeping the proper qualities of the base, the skis require expert service.

UHM GRAPHITE RACE BASE

Graphite base with ultrahigh molecular weight. Offers excellent wax absorption and ensures a perfect glide. This base is used for sport and high performance skis. It requires regular care using gliding wax to prevent any damage.

HM GRAPHITE BASE

Graphite base with high molecular weight for sport skis. The base contains higher amounts of wax-based additives plus several other additives ensuring a very good glide. To keep the proper sliding qualities, this base also requires regular care with gliding wax, ideally every day you go skiing.

HM EXTRUDED BASE

Improved extruded base with high molecular weight. Even with minimum care, this base keeps its qualities for a very long time, ensuring maximum comfort. Depending on the frequency of use, we recommend impregnating the base with paraffin wax at least once in 2 weeks.

EXTRUDED BASE

Technology adapted to the needs of occasional skiers where comfort is the principal parameter rather than glide, as well as keeping the proper qualities of the base for as long as possible while requiring least effort on the consumers' part. For skis in this category, we recommend expert service one or two times during a season.

alpine

how to choose the right alpine skis

**EASY-GOING SKIER:**

Skiing? Sure if the weather, mood and guys around are fine... and if there're enough refreshment points by the piste! You spend around 7 days and 2 weekends in a year skiing.

**FITNESS SKIER:**

Skiing is great fun! When you're in the mood, you can't get your feet off the slope. Still, enough is enough, mountains are not just skis. You spend around 7 - 14 days in a year skiing, plus weekends if the people and place are right.

**HIGH PERFORMANCE SKIER:**

Sweat and hard work is part of skiing. You like to relax, but you need to earn it. You want to rely fully on your skis, you want them to support you to the limit. You spend 14 or more days in a year skiing, plus weekends on a regular basis.

**RACING SKIER:**

Skiing is your life. You're headed for victory. If the skis don't suit you, it's their bad luck, not yours. Which, however, doesn't happen as you know exactly what you expect from them. You ski according to a training plan, your season starts with the first snow.

universum

BASE: UHM Graphite race base

As a cutting edge technologies fan I don't settle for any ordinary "planks" on the piste. A superb design is a nice thing, but I need to know what's inside. Only skis with a modern construction will support me in every situation. Nick N., 27 years

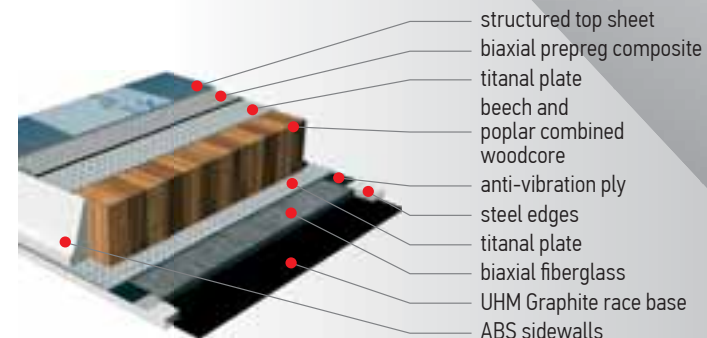

UNIVERSUM – Skis equipped with cutting-edge 3D technology based on the traditional sandwich construction with Titanal plates. Double radius for both short and mid-length turns. 73 mm under the binding will support you on wrecked slopes. A tough and uncompromising universal model requiring extra force. Not for easy goers.

length	profile	radius
160	123-73-105	10,9/13,1
168	123-73-105	12,1/14,7
176	123-73-105	13,5/16,8

TUNING: 0,75° and 89°

SET: binding PRD 11 | plate PowerRail

sincro

BASE: UHM Graphite race base

There are slopes where I could go with my eyes tied, and they are still fun. This ski allows me to enjoy every ride in a slightly different way. First I go at full speed, later I carve a nice turn... And when on the lift, I admire the ski's design.

Petr K., 32 years

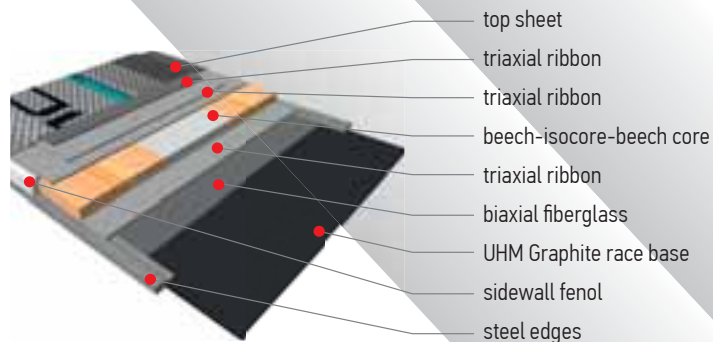

SINCRO – Original style ski with a light-weight construction. Width over 70 mm and double radius ensure comfort at high speed and stability in turns.

length	profile	radius
159	120-70-104	10,7/13,6
167	120-70-104	12,0/15,0
174	120-70-104	12,9/17,0

As you have found out yourselves, this catalogue presents a broad range of products in which every fan of Czech brands will find exactly the one he or she wants. Some products are innovated, some completely new. Our ideas for annual improvement and novelties are based on our yearlong experience with ski manufacturing in which we draw on a more than hundred-years-old tradition. What is equally important for our future steps, however, is the ideas and knowledge of you, the users, in the form of a much valued feedback. We sincerely believe that our customers will appreciate the efforts in creating high quality skis at a reasonable price.
